

About Us

Eco Pacific Pty Ltd is fully Australian owned and operated family business that manufactures central gas ducted heaters and evaporative coolers. Our mission it to manufacture the most reliable, efficient, and cost effective products without compromising on their quality.

We keep abreast of world wide technology and maintain an aggressive research and development program to ensure our products are reliable.

Customer satisfaction is paramount in all aspects of our operations. Every component in an Eco Pacific heating or cooling unit is rigorously tested for a long fault free operation before incorporating in production. This is why our product warranties are the most comprehensive and generous the industry can offer. You will also have peace of mind knowing that in the event of a product malfunction, help is just a phone call away. All componentry is readily available at a moments notice.

PLUTO

Gas Ducted Heating Range

Installed in less than a day

The Pluto components are all factory pre set and will not require on site adjustments making it easy to install in just one day.

Your Authorised **PLUTO** Dealer

Warm Quiet Effective

The comfort at low cost:

Once you have installed an Eco Pacific heating or cooling unit your comfort is assured with many years of trouble free operation. Our Pluto range heaters are covered by a 3 year comprehensive warranty. Our industrial quality heat exchangers and burners (the most expensive components in the heater) are covered by a 10 year warranty.

Saves Maintenance Costs:

Pluto incorporates the very latest self diagnostic electronics that identify problems on command saving time and money in maintenance.

AGA compliance: The heater is fully AGA complied with a certification number 5447.

EMC compliance: Pluto heaters are fully complied with the requirement of Australian compliance authority for the emission of electromagnetic radiation

There is a Pluto Perfect for your Home:

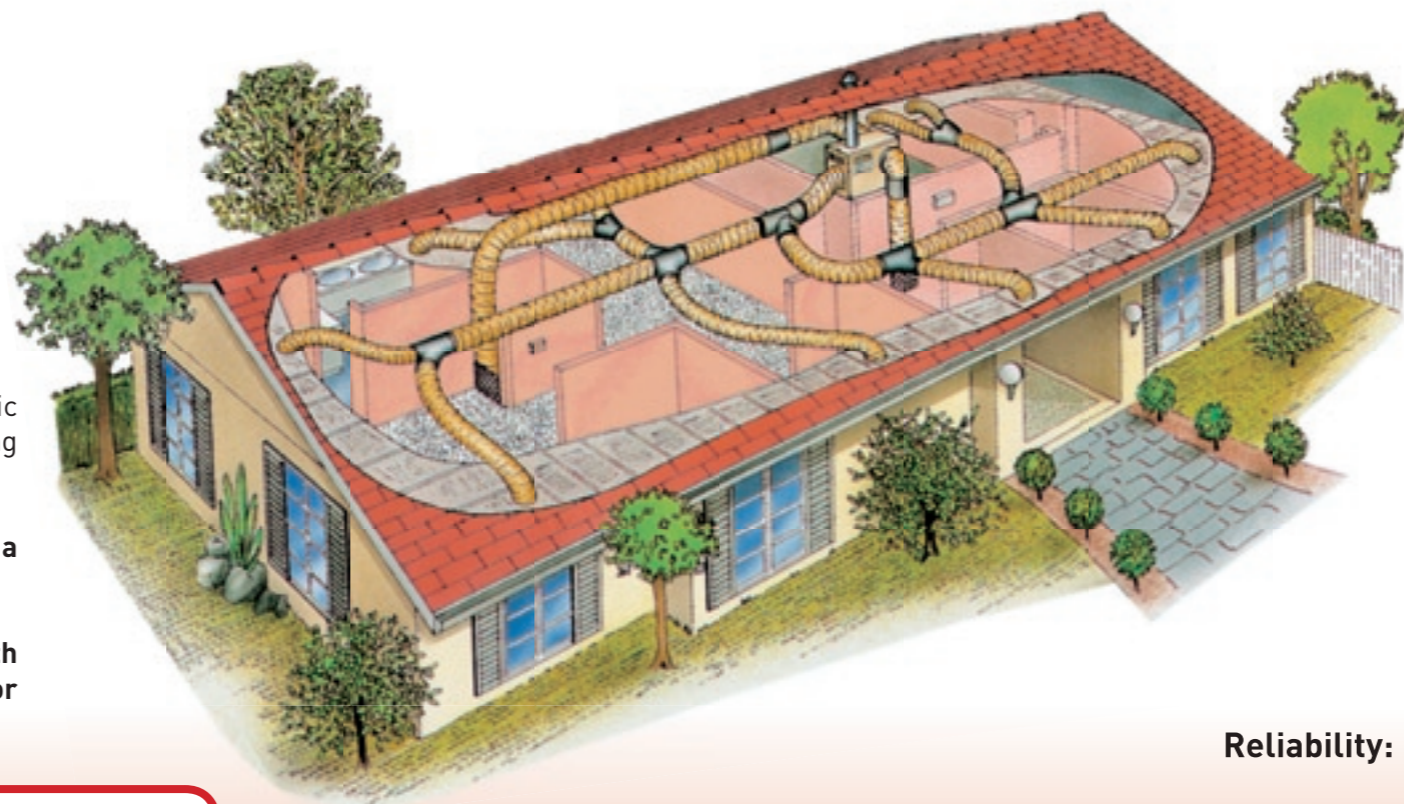

The big range of Pluto heaters delivers a heat output from 12 kW for small homes to 25 kW for large homes. There is one just right for your home. The P-12 is specially designed for flats and home units. With P-12 you can enjoy the benefits of a ducted central heating system for just a little more than the cost of a wall furnace.

Optional ESS Energy Saving System:

Pluto allows you the option of two separate heating zones. This means you can heat your living area only by day and bedrooms in the evening or simply restrict heating to one section of your home with the flexibility of heating the whole house when needed.

When you shut down a zone the fan and heat output are also reduced which saves you up to 50% off your heating costs. ESS even allows you to heat your home efficiently today and provides for the addition of an extension in the future.

Pluto has a gas energy rating of up to 3.5 stars with the option of ESS.

Pluto Gives You Flexibility:

The Pluto Central Heating System utilizes the very latest technology and provides you with maximum flexibility to your lifestyle today and the future. Pluto's unique features include the option of ESS (Energy Saver System) that allows you to warm only a section of your home, saving up to 50% off heating costs. The Pluto is especially designed for any add on cooling with minimum pressure drop through heat exchanger, that allows you to add air conditioning to your Pluto on installation or in the future. Every Pluto unit is comprehensively tested at our factory for maximum performance. Pluto is stacked with sensible, money saving and lifestyle features that will create the perfect home environment for you today and in the future.

Environmental Friendly:

Running successfully in thousands of Victorian houses for the last more than 10 years Pluto features unique, efficient air gap insulation around the heater, avoiding wasteful and environmentally unfriendly insulation materials.

Electronic Control Board:

New electronic control board is a direct spark ignition system that offers full safety to the heater and its surroundings

Electronic Ignition:

Means 100% reliability
Pluto's direct spark ignition eliminates a wasteful pilot light and hassles associated with lighting a pilot every winter and re-lighting the pilot light if it goes out.

Reliability:

With a more than 10 years of success history every Pluto heater features a quiet ignition and a variable speed powerful fan. The only way you will know its operating is by the cozy warm environment.

The Heart of the System:

Guaranteed for 10 Years- At the heart of the Pluto system is an industrial quality heat exchanger and stainless steel burner that are guaranteed to operate efficiently for at least 20 years. That's how confident we are in the reliability and performance of Pluto.
